Strange News!

Infamous Rhode Island Magazine Turns Into a Book!

After 18 years of publishing and 51 issues in magazine format, Providence-based *PARANOIA: The Conspiracy Reader* has strangely morphed to a large format book! In this new 192-page *PARANOIA* compendium, 24 authors and interviewees discuss the monumental conspiracies of our time, including:

Were the Apollo moon landings hoaxed? Is Osama Bin Laden really dead? Who wrote the occult grimoire, Necronomicon? What will happen in 2012? Who is reabducting UFO abductees? Have we received any messages from Space? Plus, everything you always wanted to know about UFO Think Tanks and the Mother of all Think Tanks: Tavistock. This exclusive collection also features the final solution to the economic downturn: Entomophagy (eating insects)! Included in this volume:

- “RE-ABS Not MILABS: How the Covert-Ops’ Reverse Engineering of Extraterrestrial Abductees Shifts the Abduction Paradigm” by Melinda Leslie,

PARANOIA has also created an online archive of sold out ‘vintage’ back issues in PDF format at www.paranoiamagazine.com, where you can take a walk down Conspiracy Lane. Get thee to the “Back Issues” tab and you can’t miss the “Free PDFs”, which contain many rare UFO and paranormal research articles from days gone by. *PARANOIA* reported on strange events throughout an awesome millennial time period – events that we can only now see were just the vague outlines of occult shadow manipulation from behind a dark curtain. You can even print these rare back issues and put them in a ‘three-ring’ binder, which is exactly how *PARANOIA* got started back in 1992 out of the Providence Conspiracy League. Plus, there are many more issues still in print at only \$7 each at the click of a Paypal button. The big secret is: it’s not too late to own the whole set!
